**Students' Use of the Internet at School**

The Board believes in providing a wide range of opportunities to access and use on-line resources and information to enhance learning, teaching, research and communication through the use of the Internet and District e-mail services. The Board encourages the responsible and ethical use of technology by staff and students. The District's technology and networks are for educational purposes only and for the business and administrative functions that support School District operations.

The Board recognizes that the dynamic nature of on-line information makes total regulation and control impossible.
