Scholarships

Rationale

The Gulf Islands School District views the granting of scholarships as recognition of student achievement and as encouragement for further education. It is committed to community involvement in the recognition of its students through the awarding of scholarships.

Policy

The Board encourages the provision of scholarships for students by individual citizens or community organizations. Such donations shall be provided in accordance with Board procedures.

Each school, where a scholarship is applicable, shall establish a Scholarship Committee to administer the granting of scholarships using the Board approved procedures.

The district will create a District Scholarship Committee, consisting of membership from each school Scholarship Committee, a trustee and a senior administrator, to effectively disburse district wide scholarships.
