Alcohol – Buildings, Grounds And Functions**Policy Statement:**

There will be no consumption of alcohol upon properties owned or operated by the Board, unless a special permit is issued by the Board.

Permits will not be issued for any district or school specific fundraising events.

Consumption of alcohol is also not permitted on student field trips or any off-site school event where students are present.

Rationale:

The Board supports the philosophy that schools are primarily for the use of children and that this use is incompatible with the consumption of alcohol on school district property or at school events where students are present.
