

Professional Growth Plan

School District 64, Gulf Islands

Name: _____

School: _____

Date: _____

Professional growth funds support teachers as they grow and develop over time to reach their professional goals. This is viewed as long term, directed growth based on specific and ever-evolving goals. The Professional Growth Plan helps to create an overall 'map' that will guide teachers as they strive to grow in their professional capacities.

Reflection- formulating thoughts on teaching practice-

What is your philosophy of education?

How do you demonstrate/reflect this in your practice?

How would you like to develop or enhance your practice to more fully support your philosophy?

What strengths do you bring to your teaching? (personal, pedagogical, curricular)

What do you find are the challenges in your practice?

What long-term goals do you have to address your challenges or enhance your teaching? (refer to question #1 on Application form)

Some actions that you are planning to take towards realizing your long term goals.
(these will evolve as time goes on)

How can Pro-G funds support current goals?
